ACADEMY OF DENTISTRY BULLETIN

1942 - 1943

TWENTIETH SEASON

VOLUME NINE

DR. LLOYD M. GROSE
President

THE PRESIDENT'S GREETING

The Program arranged this year embodies both the scientific and practical aspects of Dentistry. It aims to provide the necessary inspiration and enthusiasm for each Fellow to render better service to his patients.

The privileges of membership will again be extended to all Officers of the Canadian Dental Corps, and I hope that as many as possible will participate in our scientific and social activities.

Encouraged by the splendid response to the appeal made last year, the War Services Committee will function again this year. That the efforts of this Committee are appreciated, is indicated by the grateful letters received from many of our Fellows on active service overseas. I invite you to continue your support of this worthwhile Academy activity.

Even in these strenuous times, professional knowledge must advance. We must not be too busy to obtain this knowledge. Membership in your Academy is essential to its attainment. Let us cooperate to make this year one long to be remembered. Coming together is a beginning, keeping together is progress, working together means SUCCESS.

LLOYD M. GROSE.

OFFICERS OF THE ACADEMY OF DENTISTRY

Past President—S. A. MacGregor, 3032 Yonge St.....	HU. 8230
President—L. M. Grose, 663 Greenwood Ave.	HA. 3133

PUBLIC DENTAL HEALTH COMMITTEE

Chairman—A. B. Babcock, 165 Yonge St.....	EL. 7613
Secretary—Margaret Cowan, 2440 Bloor St. W.....	JU. 6877
Secretary of Speakers' Group—	
Charles W. Soules, 3045A Yonge St.....	MO. 8433
School Dental Service—Gordon S. Paul, 1238 Bloor W.....	LL. 4010
Members—Charles C. Collins, 1164 St. Clair Ave. W.....	LL. 5220
Helen J. Manchester, 1519 Gerrard St. E.....	HA. 3719
T. N. Scott, 86 Bloor St. W.....	RA. 4447

The Academy Committee will endeavour to further the good work done by the preceding Committee. We will miss the advice of former members who are on Active Service and therefore solicit every possible assistance the Fellows of the profession can give us.

This Committee will carry out the program as set up by the Ontario Dental Association Public Dental Health Committee. Lecturers will be provided with literature, charts, lantern slides and films for the Dental Health educational work in schools and clubs. The Secretary of the Speakers' Group will be pleased to hear from anyone wishing to assist the Speakers' Group.

We anticipate your continued interest and enthusiastic co-operation in the further promotion of our service to the public.

A. B. BABCOCK, Chairman.

CALENDAR OF DENTAL MEETINGS

1942

- Sept. 16—Toronto East Dental Association—Golf, Cedarbrae.
 “ 17—Ladies' Auxiliary—Luncheon, Granite Club.
 “ 24—Mount Sinai Dental Society.
 Oct. 21—**Academy Opening Dinner—Eaton's Round Room.**
 Nov. 3—North Toronto Dental Association.
 “ 4—Association of Downtown Dentists.
 “ 5—Toronto East Dental Association—Dinner, Guild of All Arts
 “ 6—Toronto Central Dental Society.
 “ 12—**Academy First General Meeting—Osler Hall.**
 “ 19—Mount Sinai Dental Society.
 Dec. 2—**Academy Winter Clinic—Royal York Hotel.**
 “ 8—North Toronto Dental Association.
 “ 9—Association of Downtown Dentists.
 “ 17—Toronto East Dental Association—Turkey Roll.

1943

- Jan. 6—Association of Downtown Dentists.
 “ 7—Toronto East Dental Association.
 “ 13—**Academy Second General Meeting—Osler Hall.**
 “ 19—North Toronto Dental Association.
 “ 20—West Toronto Dental Society.
 “ 21—Toronto Central Dental Society.
 Feb. 4—Toronto East Dental Association.
 “ 4—Mount Sinai Dental Society.
 “ 11—Association of Downtown Dentists.
 “ 17—**Academy Third General Meeting—Osler Hall.**
 “ 23—North Toronto Dental Association.
 “ 24—West Toronto Dental Society.
 “ 25—North Toronto Dental Association.
 Mar. 4—Toronto East Dental Association.
 “ 11—**Academy Fourth General Meeting—Osler Hall.**
 “ 23—North Toronto Dental Association—Dinner.
 “ 24—Association of Downtown Dentists.
 “ 24—West Toronto Dental Society.
 Apl. 8—Mount Sinai Dental Society.
 May 17—Ontario Dental Association.
 “ 18—Ontario Dental Association.
 “ 19—Ontario Dental Association.
 June 2—West Toronto Dental Society—Golf, Weston.

ANNUAL DINNER MEETING

Eaton's Round Room

6.30 p.m.

Wednesday, October 21, 1942

Speaker

JAMES KERR POLLOCK, Ph.D.

**Professor of Political Science
University of Michigan**

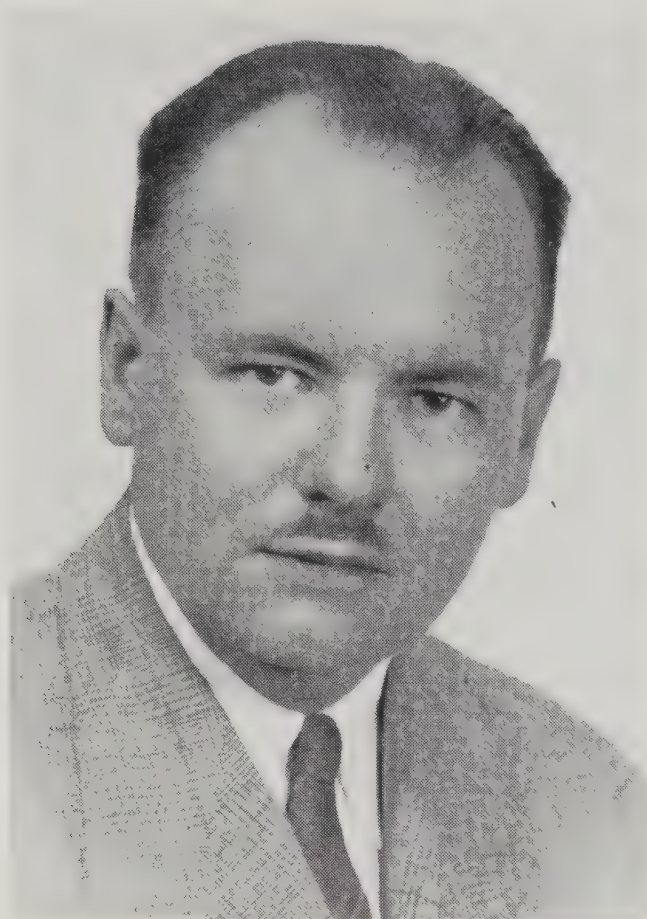

Doctor Pollock graduated from the University of Michigan in 1920, and received the degree of Doctor of Philosophy from Harvard University in 1925. After holding teaching positions in several universities, he returned to his Alma Mater to occupy the chair of Political Science.

He was a fellow of the Social Science Research Council 1927-29, and in 1935 was appointed by the Saar Plebiscite Commission to preside over voting bureaus.

He is a specialist on political parties in the United States and Europe, and has written extensively on the various phases of this subject, having acquired an intimate knowledge of European political conditions through extensive travel on the continent.

FIRST GENERAL MEETING

Osler Hall, Academy of Medicine Building, Thursday, November 12, 1942

DR. LEROY E. KURTH
Chicago

Dr. Kurth, a prosthodontist of wide experience, and a member of the American College of Dentists and Academy for Plastics Research in Dentistry, is instructor in Full Denture Construction for the Chicago Dental and Illinois State Dental Society Study Clubs. He was winner of the national essay contest sponsored by the Chicago Dental Society, on 'Mandibular Movement in Mastication'.

Subject: "COMPLETE DENTURE CONSTRUCTION"

Questions—

1. What are the physical factors utilized in retention of complete dentures?
2. What determines your diagnosis and prognosis?
3. Discuss the physical properties of the various materials used for impression taking.
4. How are complete denture impressions taken?
5. Discuss the method of obtaining a proper vertical opening.
6. What are some of the concomittant features associated with a closed vertical dimension?
7. How is centric relation obtained?
8. Why is the proper positioning of the posterior occlusal plane necessary to increase retention of either maxillary or mandibular dentures?
9. Why do we use non-anatomic teeth?
10. Explain a method for the processing of acrylic dentures.

ANNUAL WINTER CLINIC

Guest Speakers

SIR WILLIAM GLASGOW

DR. RICHARD M. SAUNDERS

Major-General Hon. Sir William Glasgow, K.C.B., C.B., C.M.G., D.S.O.—rancher, soldier, businessman and public figure—is Australia's first High Commissioner to Canada. He served in the South African War, and commanded the 1st Australian Division in World War I.

Richard M. Saunders, B.S., M.A., Ph.D. (Cornell), born in Gloucester, Mass. Formerly Instructor at American University of Beirut (Syria), later Teaching Assistant and Boldt Fellow in History at Cornell University. Now Assistant Professor in History in the University of Toronto.

Our guest speakers will address the Fellows of the Academy of Dentistry on topics of paramount interest to Canadians at the date of their presentation.

ANNUAL WINTER CLINIC

DR. LEE W. ATKINSON
Salem, Ohio

Subject: "IMPRESSION TECHNIQUE FOR STABLE FULL DENTURES"

Sore spots from dentures are considered a part of the denture patient's inevitable experience. His discomfort often may be traced to faulty impression technic. Therefore, much time could be saved, the patient's comfort more carefully assured, and good-will built up by using a good impression technic as one of the primary factors of successful denture replacements.

Recent improvements in the technic for lower impressions will make it easier to give more precise results. A full demonstration will be made on actual patients, and the presentation will include a useful impression technic for equalizing the pressure which dentures will exert on all parts of the underlying tissues, both hard and soft.

Dr. Atkinson, whose work was seen at the last meeting of the Chicago Dental Society, comes well recommended by our own Academy Executive.

N.B. This clinic will be a "LIMITED ATTENDANCE CLINIC". A charge of \$1.00 will be made, and the first 50 applicants for each (morning and afternoon) session will be enrolled.

Clinician: Dr. Lee W. Atkinson, Salem, Ohio.

ANNUAL WINTER CLINIC

DR. C. J. RINGLE
Buffalo, N.Y.

Subject: "PRACTICAL CONSIDERATION OF PARTIAL DENTURE CONSTRUCTION"

In considering the proper design of a partial cast appliance, the freedom from strain on the peridontal membrane and the retention of the appliance are of prime importance for the comfort of the patient. Dr. Ringle's experiences in this important phase of prosthetic dentistry should help the dentists to instruct their laboratory technicians in the designing and making of such appliances.

PAIN CONTROL AND PULP PROTECTION IN CAVITY PREPARATION

This clinic will deal with methods which have become popular with many practitioners in the control of pain during operative procedures. The problem will be considered from the point of view of the anatomy of the tooth—why some areas are sensitive and how they may be treated, and why others are less sensitive.

In pulp protection, the popular methods will be discussed—when to use care in protecting the pulp and to what extent. Simple methods of pulp protection will be demonstrated.

Clinician: P. Gordon Anderson, D.D.S., Toronto.

WHY DO SOME DENTURES LOSE THEIR STABILITY? HOW TO RE-LINE DENTURES WHEN NECESSARY

This presentation, illustrated by Dr. Ante's valuable pictures in full colours, will include:

- (1) A discussion (with possible solution) of many of the problems and difficulties in the construction of dentures.
- (2) New ideas for the impression of edentulous mouths.
- (3) A simplified re-lining technic.

Clinician: Irvin H. Ante, D.D.S., Toronto.

ANNUAL WINTER CLINIC

THE MANAGEMENT OF YOUNG CHILDREN—THEIR MOTIVATION, DIRECTION AND CONTROL

Children's Dentistry will play a big part in any form of future State Dentistry or Dental Health Insurance. The understanding of child behaviour is, therefore, important to the progressive dentist. With this thought in mind, we have asked Professor Bernhardt of the Department of Psychology, University of Toronto, to discuss the management of children, including the developing of the child and dealing with children's fears.

Clinician: Professor Karl S. Bernhardt, M.A., Ph.D.

DENTAL SURGERY OF TO-DAY

A review of the oral surgery which dental practitioners are called upon daily to perform is timely in any program of professional dental education.

To-day's methods of pre-operative recommendations, choice of anaesthetics, rubber gloves, sutures, needles, surgical procedures for immediate dentures, and post-operative treatments will be discussed.

This is not a clinical demonstration, but a question and answer discussion of to-day's problems in oral surgery.

Clinician: J. H. Johnson, D.D.S., Toronto.

WHAT IS THE STATUS OF ACRYLICS IN DENTISTRY TO-DAY?

During the past two years there have been many clinics and demonstrations in the use of methyl methacrylate resins for dental restorations—dentures, bridges, fillings.

We are not presenting a demonstration in the processing of acrylics in this program. It was thought, however, that an up-to-the-minute survey of the use of this material in dentistry would be opportune. The clinician chosen for this review has had extensive experience in the field of dental prosthesis, and should be fully qualified, therefore, to guide the members of the profession in the use of methyl methacrylate resins.

Clinician: H. Mercer, D.D.S., Toronto.

ANNUAL WINTER CLINIC

INTERPRETATION OF DENTAL X-RAYS AND ORAL DIAGNOSIS

Diagnosis and the interpretation of x-rays are important to every dental practitioner. Each man's reputation, with the public and his colleagues, depends, primarily, upon his ability to diagnose conditions correctly.

This clinic, by a Mayo-trained expert, will demonstrate to the general practitioner some of the more commonly misinterpreted dental findings.

The relative significance of the following roentgenological findings will be discussed:

- (1) Cementoma
- (2) Pulp stones
- (3) Retained deciduous root tips
- (4) Hypercementosis
- (5) Median line cysts
- (6) Pericoronal abscesses
- (7) The odontomes
- (8) Root caries
- (9) Residual areas of infection
- (10) The impacted third molar.

This clinic will be illustrated with slides and motion pictures in full colours.

Clinician: George A. Morgan, D.D.S., Toronto.

ESTHETICS IN FULL DENTURES AND ANTERIOR BRIDGEWORK

This clinic, by a dentist well known for his artistry in porcelain technic, discusses the reproduction of characteristics that are found in natural teeth, and should be valuable to the dentist interested in improving the natural appearance of his dentures and anterior replacements.

The clinician discusses:

- (a) The selection and arrangement of teeth.
- (b) The use of properly placed gold foil fillings, gold inlays and cast gold teeth—a very simple method of doing this will be shown.
- (c) The use of porcelain stains to reproduce the effects of erosion, discoloration, cracks, synthetic fillings, etc.
- (d) The combining all three to harmonize with the age and facial characteristics of the patient.

Clinician: J. N. Stewart, D.D.S., Hamilton, Ontario.

ANNUAL WINTER CLINIC

PROPHYLACTIC TREATMENTS

Prophylactic treatments will be increasingly important in the dentistry of tomorrow.

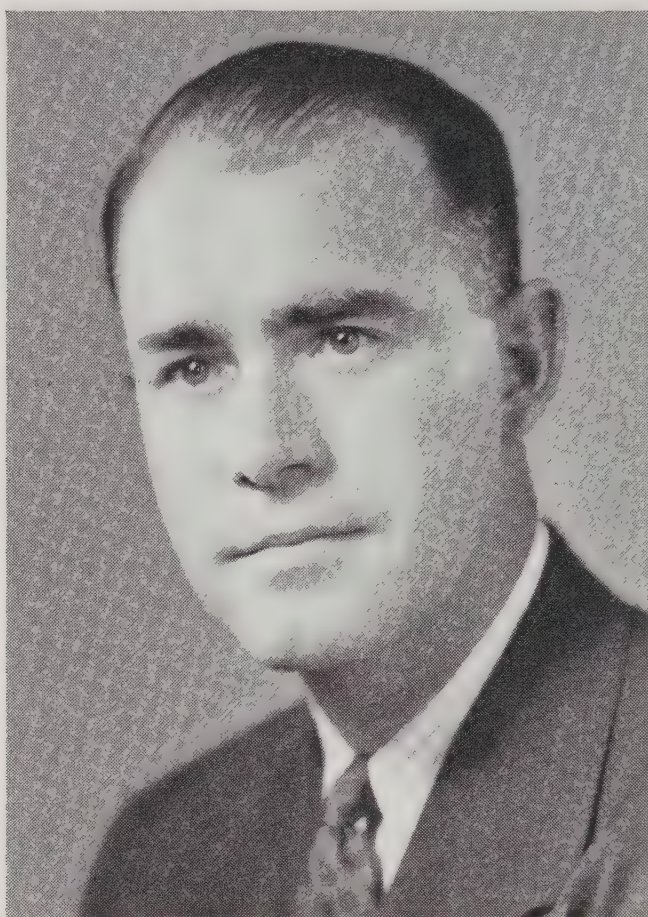

Our clinicians, men of excellent periodontal standing in the dental profession, will discuss the routine prophylactic treatment, polishing agents, the need for equilibration of occlusion, tooth brush design and synthetic bristles, dentifrices, vitamin deficiencies, etc.

To the members interested in preventive dentistry this clinic will be of great value.

Clinicians: C. H. M. Williams, D.D.S., B.Sc. (Dent.) Toronto.
Murray Robb, D.D.S., B.Sc. (Dent.) Toronto.

SECOND GENERAL MEETING

Osler Hall, Academy of Medicine Building, Wednesday, January 13, 1943

PHILIP MUNRO NORTHROP, D.D.S., M.S.
University of Michigan

Dr. Northrop received his dental education in the University of Michigan, and following post graduate study in Oral Surgery, in the same institution, was awarded the M.S. degree. After several years in the practice of Oral Surgery, both private and institutional, he was called to the University of Michigan, where he is now Associate Professor of Oral Surgery.

Subject: "SURGICAL PROBLEMS FOR THE GENERAL PRACTITIONER"

Questions—

1. By following the usual inferior dental injection, why does one fail to obtain anesthesia in from 10 to 15 percent of the attempts?
2. Does the nasopalatine nerve innervate the maxillary incisor teeth and, if so, what practical significance does such an innervation have on one's injection technic in this area?
3. Can the anterior superior alveolar nerve be anesthetized in the so-called infraorbital injection?
4. How can sufficient accessibility be obtained in the reflection of mucoperiosteal flaps without resorting to oblique incisions?
5. What technic can be used that will be helpful in the removal of difficult molar teeth?
6. How can difficult canine teeth be extracted without removing a triangular section of labial plate?
7. What is the treatment for hypertrophied gum tissue?
8. What is the present data on the value of the sulfa drugs locally in Exodontia?
9. Which sulfa drug is most desirable and why?
10. Since it is well established that Transient Bacteremias follow extraction of teeth, is there any value in premedication with sulfa drugs?

THIRD GENERAL MEETING

Osler Hall, Academy of Medicine Building, Wednesday, February 17, 1943

DR. WILLIAM HOPKINS CRAWFORD
Dean, Indiana University School of Dentistry

After serving in the United States Aviation Corps, Dr. Crawford began the study of Dentistry, and graduated from the University of Minnesota, in 1923. Since that time he has been continuously engaged in the teaching of Dentistry. Prior to acceptance of his present position, he was on the teaching staffs of the University of Tennessee, and Columbia University.

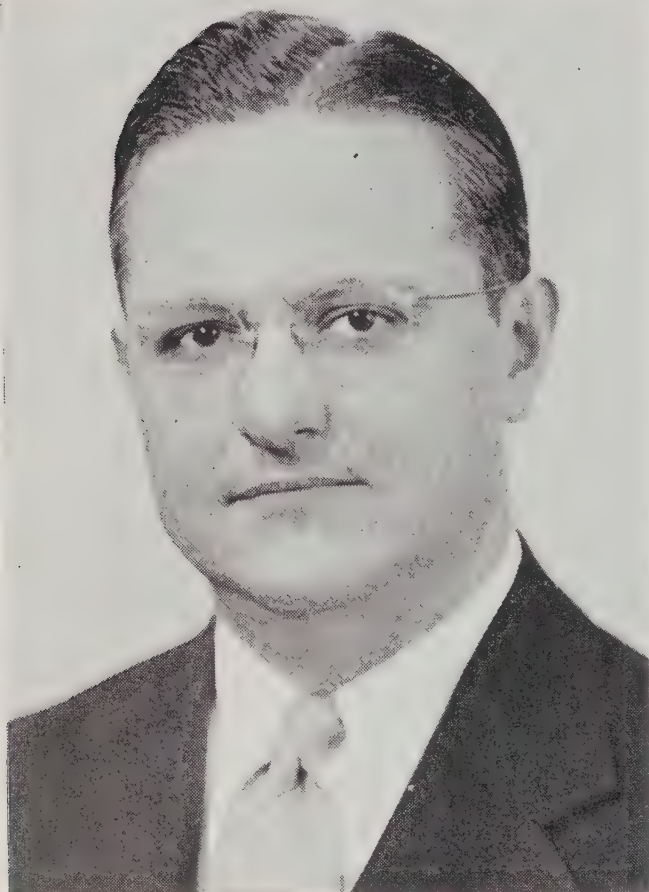

Subject: "AMALGAM AS A RESTORATIVE MATERIAL"

Questions—

1. Why are most amalgam alloys very similar in chemical composition?
2. What is the chemical and mechanical reaction between amalgam alloy and mercury?
3. Explain the typical setting reaction of amalgam with reference to dimensional change.
4. How is dimensional change or expansion reaction affected by
 - a. Time and pressure in amalgamation? b. Packing pressure?
5. Does expansion insure marginal seal?
6. What is the clinical effect of expansion? Is flow an important clinical physical property?
7. How are flow and strength affected by:
 - a. Time and pressure during amalgamation? b. Packing pressure?
8. What are the clinical applications to the development of strength?
9. How are setting, expansion, flow, and strength affected by particle size?
10. Does mulling in the hand have injurious effects on amalgam?
11. Is the presence of moisture in the cavity during packing apt to have an injurious effect on the amalgam?
12. Where is the use of amalgam indicated?
13. How has amalgam served the profession?
14. Is amalgam a potential cause of irritation by galvanic action?
15. What may be done to minimize tarnish and discoloration in amalgam fillings?

FOURTH GENERAL MEETING

Osler Hall, Academy of Medicine Building, Thursday, March 11, 1943

PHILIP JAY, D.D.S., Sc.D.

LEONARD SAMUEL FOSDICK, M.S., Ph.D.

HAROLD KEITH BOX, D.D.S., Ph.D.

FOURTH GENERAL MEETING

Osler Hall, Academy of Medicine Building, Thursday, March 11, 1943

Philip Jay, D.D.S., Sc.D.

Assistant Professor of Dentistry, University of Michigan Dental School.

Since graduation from the University of Michigan School of Dentistry in 1923, Dr. Jay has devoted much study to Bacteriology in relation to Dental Disease. He was Associate in Bacteriology in the School of Medicine and Dentistry, University of Rochester, 1924-29; since 1929 has been engaged in Dental Caries Research at the University of Michigan Dental School. He is a member of the Society of American Bacteriologists, American College of Dentists, and International Association for Dental Research, being president-elect of the latter, 1941-42.

Leonard Samuel Fosdick, M.S., Ph.D.

Professor of Chemistry, Northwestern University Dental School.

Dr. Fosdick received both his M.S. and Ph.D. degrees from Northwestern University, and since 1927 has been a member of its teaching staff, in Chemistry. He is Associate Editor of the Dental Research and Graduate Study Bulletin, and President of the Chicago Chapter of the International Association for Dental Research. His published writings in the field of Chemistry and Dental Research are extensive and varied.

Harold Keith Box, D.D.S., Ph.D.

Research Professor of Periodontology, University of Toronto Faculty of Dentistry.

Dr. Box is a graduate of the Royal College of Dental Surgeons of Ontario, and began his teaching career in the same institution as demonstrator in Bacteriology, in 1914. Since that time he has been continuously engaged in dental teaching and research, as well as in private practise. He has been awarded several distinctive honours—is a Fellow Royal Society Medicine, Fellow Royal Microscopical Society, Fellow American Academy Periodontology, and Honorary Consultant to Department of Health in Oral Hygiene (Province of Ontario).

Subject: "SYMPOSIUM ON DENTAL CARIES"

This meeting will be a discussion of dental caries and caries control, each essayist presenting his views on the subject.

TAKING THE EDGE OFF THE KNIFE EDGE with KONFORMAX REBASE

The above model shows a Knife-Edge Lower Ridge which always produces discomfort for the patient and trouble for the dentist.

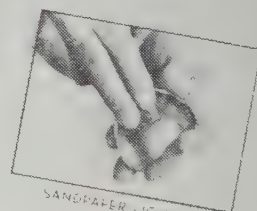

Konformax Rebase applied to the denture acts as a "cushion" and allows the patient to wear denture with perfect comfort.

In extreme cases, construct groove in denture over the Knife-Edge and fill groove with Konformax Rebase.

Konformax Rebase is smooth and easy flowing . . . Does not set by chemical action . . . Variations of office temperature have no effect on it . . . The composition of Konformax Rebase does not deteriorate with age . . . It is always ready . . . It produces perfect suction and cushion . . . Lasts in the mouth from six weeks to six months . . . Is non-irritating and may be used on any standard denture material, either full or partial . . . Is not affected by saliva . . . and is inexpensive because ten or more rebasings can be obtained from a \$4 package of six tubes.

TORONTO EAST DENTAL ASSOCIATION

DR. EARL BANCROFT
President

The Toronto East Dental Association gives you the following program for the year 1942-43:

The annual golf tournament will be held at Cedar Brae on Wednesday, September 16th, at 1 p.m.

Opening Dinner—Guild of All Arts, November 5th, at 7.00 p.m.

Annual Turkey Roll—Acorn Bowling Alley, on Thursday, December 17th, at 9.30 p.m.

The three general meetings will be held at the Eton Hotel on January 7th, February 4th, and March 4th. These will be dinner meetings, one followed by an outside speaker, one by a clinic and one by a dental speaker.

President

Past President.....	A. B. Babcock
President.....	J. H. Johnson
President-Elect.....	G. D. McVicar
Secretary.....	H. Walton-Ball
Treasurer.....	J. C. MacLaurin
Academy Representative.....	A. B. Babcock
Executive Members: T. A. Alstadt, M. V. Cosentino, R. J. Godfrey, S. Perlman, A. R. Scott.	

The tentative dates for the meetings of the Association of Downtown Dentists for this season are November 4th and December 9th, 1942, and January 6th, February 11th, and March 24th, 1943. As in the past, each meeting will be a dinner meeting commencing promptly at 6.30 p.m., and we look forward to a continuance of the good fellowship of former years. The programs will be scientific, social and general. All dentists in the downtown area are cordially invited to attend, while an especial welcome awaits any members of the Canadian Dental Corps who may be stationed in Toronto. The Secretary will give the members due notice of the place and program of each meeting.

TORONTO CENTRAL DENTAL SOCIETY

DR. EDGAR A. WHITE
President

The Toronto Central Dental Society this year, as in the past is confining its activities to the social and intellectual side of dentistry rather than the professional.

The first meeting of the Central Society will be an open meeting, to which the members, the executives of the Academy and local societies together with their wives are invited. The rest of the meetings are held at Hart House and take the form of dinner meetings at which outstanding men in their chosen callings are speakers.

A considerable number of our members are on Active Service. A cordial invitation is extended to the members of the Canadian Dental Corps stationed in Toronto to attend our meetings.

The tentative dates for our stated meetings are November 6th, January 21st and February 25th.

What's In A Name?

Ninety-eight years ago, Samuel S. White, then a youth of twenty-two, saw that dentistry was handicapped by crude tools and materials. Practically all dentists carved their tooth forms from ivory, bone or hippopotami teeth; made their own instruments and materials used in treatment. Commendable though their efforts were, quality was questionable, standardization unknown, progress slow and uncertain.

Resolving to remedy this condition, he set before himself two objectives: make better goods and deal fairly with all who purchased his products. He lived to see his work honored by awards of distinction and one world prize after another. His name is still regarded as a symbol of quality wherever dentistry is practised.

NORTH TORONTO DENTAL ASSOCIATION

DR. J. HARRY REID
President

It is my pleasure to announce the forthcoming fall and winter activities of the North Toronto Dental Association. The program as arranged for this season will be principally Dental Subjects.

The January meeting has been left as an "Open Night" and for this reason it is the desire of the executive to have an expression of opinion from the members regarding the kind of meeting to be held at that time. We ask your wholehearted co-operation so that we may in future continue to have our seasonal programmes instructive, interesting and of the most benefit to the membership body as a whole.

PROGRAMME

Tue., Nov. 3rd, 1942—

Group Clinic (followed by discussion)

Dr. S. W. Leslie—Pharmacy in Dentistry.

Dr. W. L. Hugill—Silicates.

Dr. E. A. White—Exodontia.

Tue., Dec. 8th, 1942—Dr. Harold Box—Dental Caries.

Tue., Jan. 19th, 1943—Open Night.

Tue., Feb. 23rd, 1943—Dr. W. B. Amy—X-rays.

Tue., Mar. 23rd, 1943—Annual Dinner.

OFFICERS FOR THE SEASON 1942-43

Past President.....	F. H. Shepherd
President.....	J. H. Reid
President-Elect.....	C. W. Soules

WEST TORONTO DENTAL SOCIETY

DR. J. A. HILLIER
President

The West Toronto Dental Society has planned the following program for this season, viz.:

Our opening dinner meeting will be held early in November.

The tentative dates of our three general meetings are January 20th, February 24th and March 24th.

Our members will receive advance notice of these meetings; and we earnestly solicit their support.

Our closing meeting of the season and election of officers will be held at Weston Golf Club on Wednesday, June 2nd.

OFFICERS FOR THE SEASON 1942-43

Past President	J. N. Dales
President	J. A. Hillier
Vice-President	W. W. Macdonald
Secretary-Treasurer.....	J. E. Hackett
Councillors.....	B. MacNeill
	R. J. Marshall
	G. S. Paul
	H. L. Bruce
Councillor to Academy.....	J. G. Chalmers

NEXT TIME, SPECIFY

ROBERTS

LOCAL ANAESTHETICS

Roberts Local Anaesthetic gives a deeper, smoother, more rapidly acting anaesthesia of sufficient duration for all forms of dental surgery. Roberts Local Anaesthetic, before being released to the profession, is clinically tested, guaranteeing the utmost uniformity and dependability. Used and enthusiastically endorsed by hundreds of dentists throughout Canada. It is available in cartridges, ampoules, and vaccine capped bottles, also in tablets.

TOPICAL ANAESTHETIC

Roberts Topical Anaesthetic is an antiseptic, anaesthetic solution for use in producing anaesthesia of mucous surfaces prior to the injection of local anaesthetic. In dentistry, a small piece of cotton is soaked in Roberts Topical and placed on the gums for a minute or two. Painless insertion of the needle is then an easy matter. Also of value in scaling and instrumentation of the soft tissues and in preventing gagging.

ASEPTOSOL

A valuable new antiseptic and germicide with a bactericidal action several times stronger than pure carbolic acid. Non-toxic, non-corrosive, and non-irritating to sensitive tissues. Patients appreciate its pleasant perfume and freedom from the phenol or cresol odour associated with older types of antiseptics. Of particular value as a germicidal pack for infected tooth sockets and for cold sterilization of instruments. Available in pounds, winchesters, gallons.

DENTACAPS (GELATINE CAPSULES)

Dentacaps are specially developed to meet the full dental requirements in mineral and vitamin balance. They assist in maintaining and building up the resistance of gingival tissues and in preventing dental decay due to mineral and vitamin deficiency. Dentacaps contain an adequate therapeutic dose of calcium and phosphorus combined with Vitamins A, D, and C in correct proportions. Dentacaps are available on prescription in bottles of 30 and 100 or they may be obtained direct.

ROBERTS BIOLOGICAL LABORATORY

1175 BAY STREET, TORONTO - RANDOLPH 5117

CLINICAL SAMPLES ON REQUEST

MOUNT SINAI DENTAL SOCIETY

DR. JOHN A. SHERMAN
President

The Mount Sinai Dental Society in its sixteenth year of existence plans a season of stimulating meetings addressed by a group of outstanding clinicians and essayists.

As in the past, the Mount Sinai Dental Society will actively co-operate with the Academy of Dentistry, and all Fellows of the Academy are cordially invited to attend the regular meetings of the Society, the programme of which appears below:

- Thursday, September 24th, 1942—Dr. S. Stulberg, Detroit, Mich.—“Ch’ld Management and Operative Procedure”.
- Thursday, November 19th, 1942—Major Wm. Rich, Camp Fort Dix, N.J.—Dinner Meeting.
- Thursday, February 4th, 1943—Dr. D. Seligson, Detroit, Mich.—“Office Management in Time of War”.
- Thursday, April 8th, 1943—Dr. M. H. Jacobs, Boston, Mass.—“Clinical Pathology of the Jaws”.

ANDREW J. McDONAGH, L.D.S.
1867-1942

W. E. CUMMER, D.D.S., C.S.B.
1879-1942

The Academy of Dentistry, Toronto, joins other branches of organized dentistry throughout the world in expressing regret at the passing of two of Canada's best known and best beloved dentists.

Their long and useful lives were not, in any sense, restricted to any one calling. Their unbounded energy found fruitful expression in many enterprises and their cheerful personalities will be greatly missed by their friends and associates.

Easy chair or Local Anesthetic

that "friendly feeling" lets you relax!

WHEN you're finally at home after a trying day, how grand it is to relax . . . in your easy chair! It cuddles up to comfort your spine, cushions your tired muscles. It fits you. Long association has made it familiar . . . friendly . . . dependable.

In your working hours, familiarity with dependable Cook and R. B. Waite anesthetic solutions can ease the tension, too—for you and your patients. You'll find them repeatedly trustworthy for pain control. And after using *both*—Novocain with Cobefrin and Novocain-Pontocaine-Cobefrin—you very likely will pick one, just as you picked one chair at home, as best-suited to your personal requirements.

Twins in tolerance, these two widely-used solutions are *individual* in action. Novocain - Pontocaine - Cobefrin has been developed to provide the same wide margin of safety afforded by Novocain with Cobefrin — the same profound anesthesia — but to extend this anesthesia over a longer operating period.

To choose your own favorite, specify both with your next order. Many dentists use both, daily.

THE ONTARIO SOCIETY OF DENTAL ORAL SURGEONS

The Ontario Society of Dental Oral Surgeons was organized on November 13, 1941. Its membership consisted of the Toronto Society of Dental Oral Surgeons as well as the recognized practitioners in the province whose practice was limited to Exodontia, Oral Surgery, Dental X-ray and Diagnosis. The officers of the Toronto Society of Dental Oral Surgeons, Dr. G. A. Morgan and Dr. W. W. Breslin, continued until the meeting in May when elections were held.

The work of the Society included the preparation of a brief for the R.C.D.S. Board as an aid in possible legislation for the regulation of specialists in this province. A group clinic was also presented by six of its members at the Ontario Dental Association's 75th Convention in May.

The officers for 1942-43 are:

President.....Dr. J. H. Johnson, 230 College St., Toronto
Sec'y-Treas.....Dr. W. W. Breslin, 206 Bloor St. W., Toronto

Membership Roll:

W. W. Breslin, Toronto	J. H. Johnson, Toronto
J. M. Cation, Toronto	J. F. M. Kennedy, London
W. L. Chalmers, Toronto	G. A. Morgan, Toronto
J. P. Coupland, Ottawa	C. T. Moyle, Hamilton
W. Aubrey Crich, Grimsby	E. W. Paul, Toronto

G. W. Everett, Hamilton	H. M. Robb, Toronto

THE TORONTO ORTHODONTIC CLUB

The Toronto Orthodontic Club is now entering its fourteenth season.

During the past year the club completed an intensive study of the recent researches of Allan G. Brodie, D.D.S., Ph.D—"On the Growth Pattern of the Human Head", with each member submitting a thesis on one phase of the subject. Another programme of study is under way for this year.

The officers for the season 1942-43 are:

PresidentM. R. Culbert
President-ElectMargaret Cowan
Secretary-Treasurer..... S. Simon

Our First Duty... Is the War Effort...

During the past several years many of our technicians have entered the armed services voluntarily.

The replacement of these men has not been easy at a time when technicians are scarce. Our policy of training our help to assume new and higher responsibility in their work has fortunately enabled us to maintain the quality of our services.

We are doing our utmost to take care of your requirements . . . so . . .

YOUR INDULGENCE . . . PLEASE!

DENTAL NURSES' ALUMNAE ASSOCIATION OF CANADA

The Dental Nurses graduate from the Faculty of Dentistry, University of Toronto, and with their training and experience are a great asset to a dental office. We extend an invitation to all Dental Nurses to join us and to the graduates of this year, we welcome you. The Alumnae meets on the second Tuesday of each month.

In the first year of the war the proceeds of our Annual Bridge were given to the Canadian Dental Corps to establish a Regimental Fund, and the following year the proceeds were given to the Canadian Dental Corps for their Mobile Dental Clinic Fund. Last year we urged the graduates to help make our year a real success, and by team work, we were able to present a mobile dental clinic to the Canadian Dental Corps. As far as we know, we are the only ladies' organization to accomplish this.

We are very grateful to the Academy of Dentistry for this opportunity of giving a message to the members of the Dental Nurses' Alumnae.

ANNA A. LINDSAY,
President.

TENTATIVE PROGRAMME

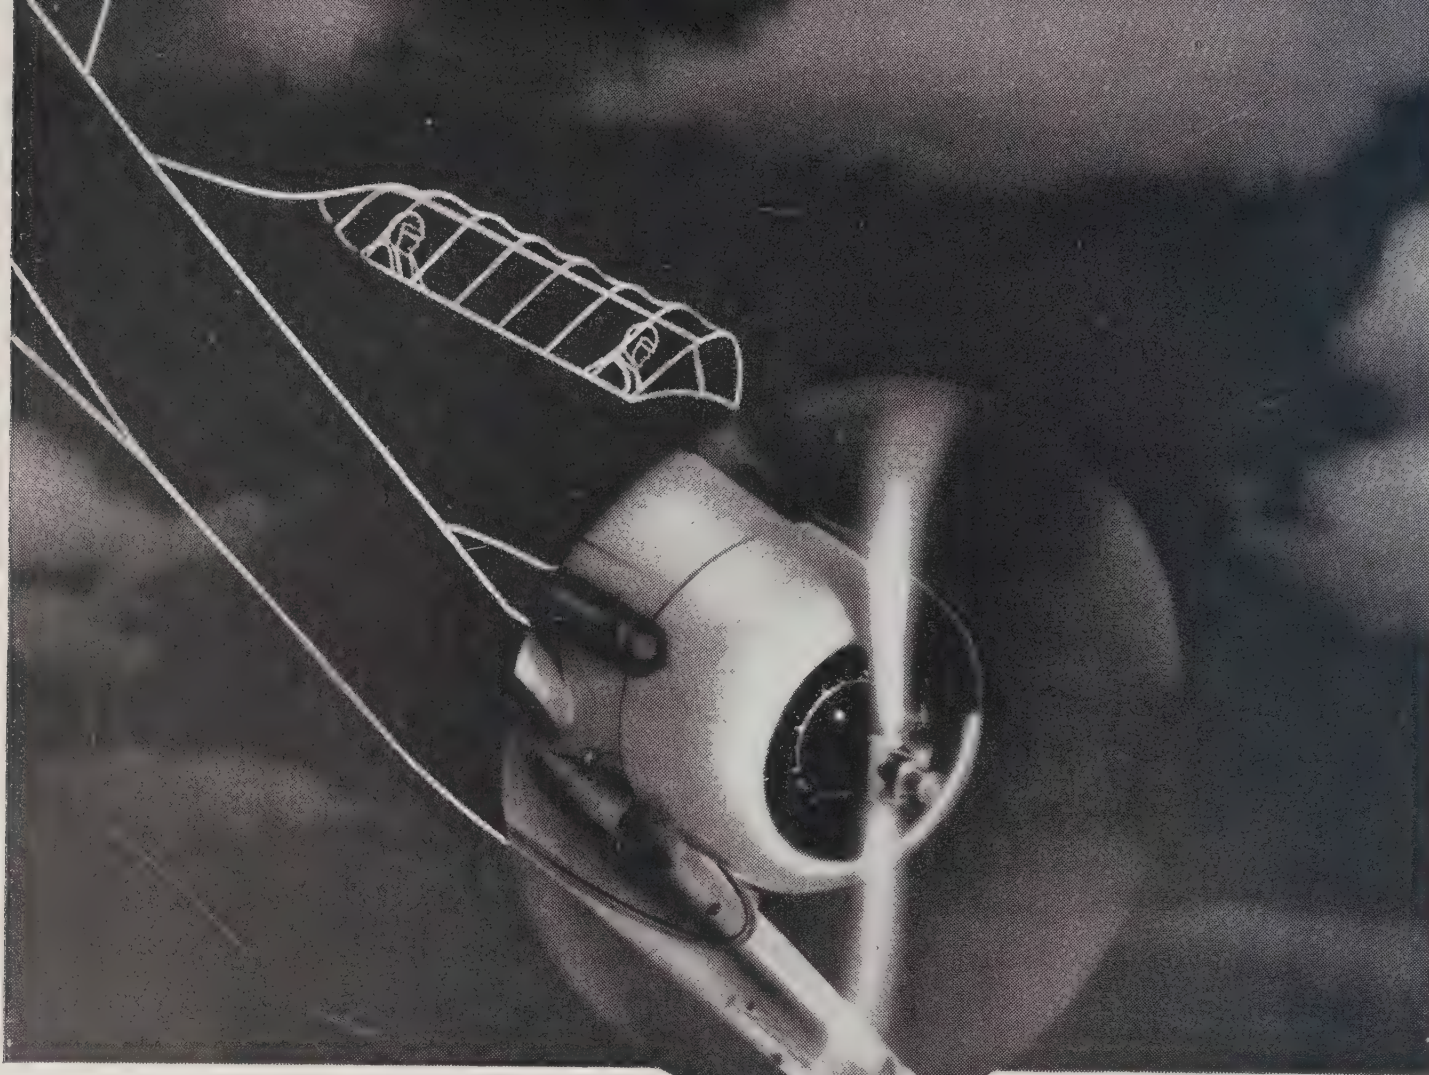

- September—Homecoming; Colored Movies of Presentation to Canadian Dental Corps.
- October—Mother and Daughter Banquet—Speaker: Mrs. H. J. Mullett.
- November—Speaker: Dr. S. J. Lesco. Annual Dance.
- December—Christmas Party—Shower for Babies in England.
- January—Speaker: Dr. Isabel Ayer.
- February—Annual Bridge.
- March—Debate.
- April—Speaker. Current Events.
- May—Musical.
- June—Graduation Dinner. Annual Meeting.

"TORONTO CHAPTER" OF ONTARIO DENTAL NURSES, AND ASSISTANTS' ASSOCIATION

The President and the Executive take this opportunity of extending to all Dental Nurses and Dental Assistants a friendly greeting and an invitation to join us in our activities for the coming year. We have endeavoured to prepare a varied programme which we believe will catch the interest and enthusiasm of everyone. Our aim is to work hard to advance the best interests of our profession, to increase our war effort and to intermingle with all this, fun and lasting friendships.

We meet at the Royal York Hotel, the first Monday of each month, in private dining room 7, at 8 p.m.

We should like to thank the Academy of Dentistry for the interest they have shown in our organization and for providing this means of reaching the Nurses and Assistants throughout Toronto and District.

DORIS GREGORY,
President.

TENTATIVE PROGRAMME FOR 1942-43

September—Get Together Night. Speaker: Captain G. D. Davis.
October—Dr. Elizabeth Ghant Robertson—Nutrition.

THE LADIES' AUXILIARY TO THE ACADEMY OF DENTISTRY AND THE CANADIAN DENTAL CORPS

MRS. K. R. HARRIS
President

The Ladies' Auxiliary is very happy to have this opportunity of extending to the members of the Academy cordial greetings and our sincere wish that your work this year may continue to meet with the same success as in the past. To the many dentists who have assisted us in the collection of old gold we say "Thank you." You have in this way made a substantial contribution to our War Fund, which by April 1st of this year had provided more than \$3,000.00 worth of comforts and treats for the boys of the Dental Corps. Our current project in this connection is the raising of a "Mile of Pennies."

A luncheon meeting at the Granite Club on September 17th will open the interesting programme planned for the coming season. We extend an invitation to the wives of all members to join us, and we shall be glad also to welcome the wives of any men of the Dental Corps, who, though they may not be members of the Academy, are at present stationed in Toronto.

The sewing group meet every Friday from 10 to 4 at the Red Cross Sewing Centre, 4th floor, 4 Albert St.

VITALLIUM ... *The Friendly Alloy*

Vitallium, the "Friendly Alloy" has been prescribed in many thousands of successful cases restoring lost vertical dimension.

Such dentistry has a powerful appeal to the public mind because its esthetic benefits are so readily discernible. Not alone do Vitallium vertical dimension prostheses provide functional efficiency and promote oral health, but they also lend more youthfulness, more charm, and more natural expression to prematurely aging faces. They have a distinct social and economic value to the patient in addition to their functional advantages.

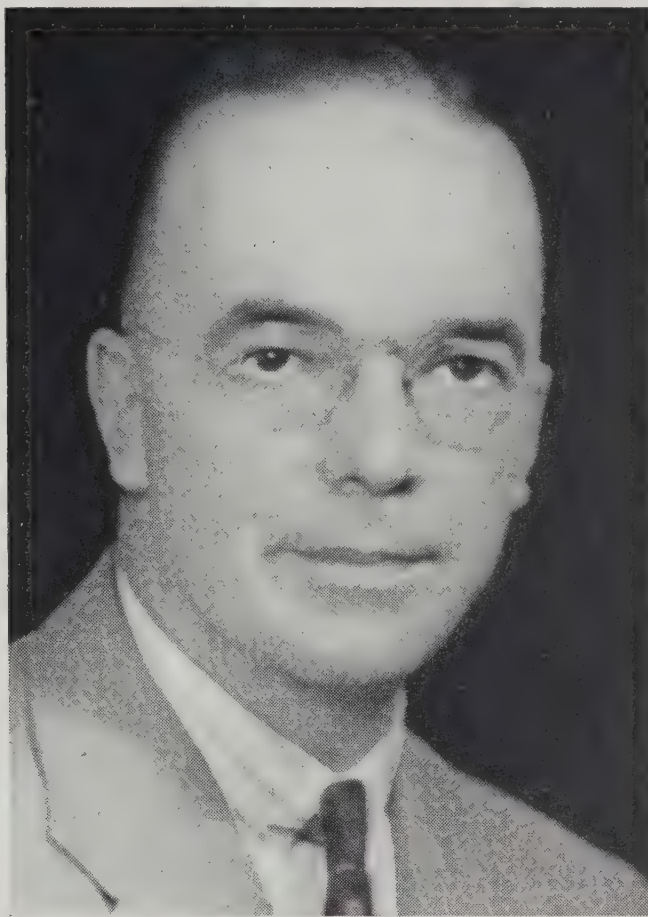

The physical properties of Vitallium make it particularly suitable for vertical dimension restorations. It has the rigidity to withstand functional stresses and requisite strength and lightness for the construction of thin and graceful appliances without bulk.

ONTARIO DENTAL ASSOCIATION

DR. S. LEE HONEY
President

In these days of conflict we often hear remarks about the new order that will follow the world war. Some believe that our profession will come under outside influences which will create an entirely new structure. Others hold the opinion that the members have it within their power to so perfect dental teaching and practice, that its future guidance would be controlled by the builders. In this latter class one might assume that there are many members of the Toronto Academy. They have been an inspiration to the profession's membership for many years by undertaking the role of reformers among their confreres.

To those who gave time and talent the practitioners at large should be grateful. We believe they are.

The agriculturist chooses the best heads of grain to use for next year's harvest. We trust that the Academy will continue to select the choice heads to not only perfect those procedures and practices for the next generation, but to inspire their neighbors to add something to the store of knowledge as well.

Ralph Waldo Emerson expressed this thought very well, over 100 years ago, while addressing a mechanic's library association in Boston: "And, further, I will not dissemble my hope that each person whom I address has felt his own call to cast aside all evil customs, timidities, and limitations, and to be in his place a free and helpful man, a reformer, a benefactor, not content to slip along through the world like a footman or a spy, escaping by his nimbleness and apologies as many knocks as he can, but a brave and upright man, who must find or cut a straight road to everything excellent in the earth, and not only go honorably himself, but make it easier for all who follow him to go in honor and with benefit."

Perhaps there are no new problems, but it is refreshing to find continued new enthusiasm in the ranks of the Academy for meeting these problems.

On behalf of the Ontario Dental Association, may I express sincere gratitude for loyal support and splendid co-operation we have always received from the Academy and now at the beginning of another season's activities—our best wishes.

THE BLACKOUT OF PAIN!

Every Novol Product — Monocaine Anestubes, Novampuls, Ampules, Bottles and Tablets—Needles—Syringes Benzocaine (Surface Anesthetic)—Pembules (Sedative)—Sulfanilamide, Sulfathiazole (Novocol)—Novocol Emergency Tubes — is marketed with one idea in mind —

To Blackout Pain in Dentistry

For more than 30 years, the skill and genius of our organization have been devoted to this single purpose.

No wonder each is the standard in its field —

Monocaine induces deep, safe, profound anesthesia.

Benzocaine (Novocol) is a reliable, effective surface anesthetic.

Pembules (Capsules of Pentobarbital-Sodium Novocol) allays fear and reduces nervous apprehension, decreases the toxicity of the anesthetic.

Sulfanilamide (Novocol) —combats streptococcus infection.

Sulfathiazole (Novocol) —combats staphylococcus infection.

Novol Needles—are keen edged, extra-sharp. **Novol Emergency Tubes** are an "insurance policy" in emergencies when minutes count.

NOVOCOL CHEMICAL MFG. CO. OF CANADA LTD.

11-13 Grenville St. Toronto, Ontario

Novol Products Sold in Canada are Made in Canada

CANADIAN DENTAL ASSOCIATION

DR. A. L. WALSH
President

Recently, when asked to comment on our Dental Corps, one of the officers replied, "It is Ace-High with me!" It was a real pleasure to hear this eulogism and compliment paid to Colonel Lott and his well organized unit, with apparently excellent esprit de corps.

The letters A.C.E. suggest our three responsibilities at the present time. The Army is our foremost interest. Canada is engaged in the largest war effort in her history, and on the outcome of that war depends the very existence of Canada, of Canadian institutions, and the life and freedom of the Canadian people.

The Civilian population will, meanwhile suffer from lack of dental service. We must all double our efforts for the duration, in order to keep under control, dental disease, the white man's plague.

Thirdly, Education in Dentistry, the foundation upon which all our efforts are to be built, must maintain its high standards, and at the same time accelerate its courses in order that more officers and dental practitioners might be made available.

The Academy of Dentistry has always taken the lead in our professional problems, standing 'Ace-High' among the dental organizations of our Dominion of Canada.

The Canadian Dental Association extends its best wishes for continued success in your work.

WAR SERVICES COMMITTEE

Chairman: Howard Graham.

Secretary-Treasurer: L. D. Drew-Brook.

You will be pleased to know that the War Services Committee of the Academy of Dentistry has been very active in the interests of our colleagues in the overseas forces. All of the activities of the Committee are conducted by sub-committees listed below. After you read this, we hope you decide to "Help us to keep them happy".

Rehabilitation Committee:

Information is being collected concerning re-establishment in practice for the benefit of those who will be leaving army service.

Advisory Committee:

The wives or immediate families of officers away from home are assisted by opinions or advice concerning illnesses, housing difficulties and other matters.

Letter Writing Committee:

The boys overseas clamour for letters from home and a system is established whereby each man overseas receives a letter from one of his classmates at regular intervals. When you receive a call in this connection, please co-operate.

Essentials and Comforts:

Boxes are being sent every six weeks to officers overseas containing food supplements and materials not otherwise available. We have already had many thrilling letters expressing the gratitude of our colleagues overseas. The funds collected through the Academy are being used for this purpose. More money will be needed, month by month, and while a number of members have subscribed, the majority have not, and consequently funds are getting low. We don't want to fail our boys overseas and therefore this special appeal is being brought to your immediate attention. Your subscription, from fifty cents to two dollars per month, will be greatly appreciated. Phone Dr. L. D. Drew-Brook and tell him you would like to help. Let everyone have a part.

OUR BOYS OVERSEAS SAY "THANK YOU"

The following are excerpts from a few thrilling letters:

"Your letter outlines a very thoughtful and practical plan for assisting Toronto Dental Officers and their families."

W. G. Trelford.

"It was a most pleasant surprise and provided a very welcome supplement to our regular army rations . . . the person responsible for the selection did a remarkably thorough and efficient job."

Gordon D. Leggett.

" . . . box from the Academy was one of the very best. Apparently, from the enclosed sticker, (SALVAGED FROM THE SEA) it had some rough experiences while on the way over, but luckily it did not get wet. My sincere thanks."

C. Fred Lewis.

"These comforts mean a great deal to us over here. Please accept my most sincere thanks."

Douglas Tanner.

"It is very good news to note that further gifts are being sent and from this one, I would suggest that the choice of contents is ideal."

J. S. Wilkinson.

" beauties of the English countryside. Still there's no place like home and to hear from the folks back there is a real treat."

James Smith.

"I want to express my appreciation to the Academy for a parcel I received this past week. I guess I was lucky to get it as you will see by the enclosed customs declaration and a bit of the contents." (which were partly burned and charred.)

Glenn Mitton.

"Please convey my most sincere gratitude to the Academy for articles which in every case have proved most practical; and impossible to get over here."

Lloyd J. Saunders.

"Thanks a lot for your friendly spirit and thoughtfulness; it really carries a boost."

Geo. T. Walker.

"Thanks again for another parcel of excellent eats from the Academy what is appreciated most is the thoughtfulness we know it conveys."

Ford (Dooley) Butler.

"Thank you for the handsome parcel. It was very well and sensible arranged decent note paper is very hard to get and the odd pad would be appreciated."

W. L. Finlay.

"rehabilitation look up a suitable office complete with a couple of blondes. On second thought forget about the office."

(Name furnished to person supplying blondes. It's a little out of our line.)

"What we miss most is news of happenings in Toronto, particularly with regards to dental meetings."

Robert Brown.

Please help us to keep up the good work. Send us more money with which to mail boxes. Write a letter to your confrere overseas.

REPORT OF SECRETARY FOR 1941-42

THE EXECUTIVE

The traditions and activities of the Academy were carried on for the season 1941-42 under the Presidential leadership of Dr. Stewart A. MacGregor.

Nine full Executive meetings were held to arrange for the routine affairs of the Academy, as well as many sub-committee meetings to look after special assignments.

Much credit is due to members of the Executive Council who supervised the various divisions of the year's work. Their efforts combined to produce an interesting year of dental instruction for the Fellows of the Academy.

It might be of interest to note here that most of the program plans for the year were completed by May, 1941, preceding the Academy year. Each February the President and President-Elect are sent to the Chicago Dental Society to look for speakers and clinicians who will have dental technics and knowledge that will be beneficial to the members of our Academy of Dentistry. The diversified and interesting programs of the past years bear out the wisdom of this procedure.

MEMBERSHIP

The Executive Council viewed with satisfaction the increase in membership, which accounted, this year, for approximately 54% of the dentists of the City of Toronto. There is still room for improvement in this percentage, however. Indeed, it is a challenge to our profession to note that 79% of the physicians of Toronto are members of the Academy of Medicine.

Complimentary memberships were extended by the Executive Council to 89 officers of the Canadian Army Dental Corps who formerly were members of the Academy of Dentistry of Toronto.

COMMITTEES

The Study Group Chairman, Dr. W. H. Walton-Ball, was able to organize one study group for the Academy members. Dr. W. B. T. Amy was the instructor for an Oral Surgery Group. Interest in other dental subjects was such that the Executive Council felt no further facilities should be provided until there was a demand on the part of the membership for study groups. Apparently civilian dentists have been too busy with their practices to have sufficient time to devote to co-operative study.

In order to provide a more effective contact with Toronto officers of the Canadian Army Dental Corps (overseas) a War Services Committee was set up under the leadership of Dr. T. Howard Graham. Many boxes of comforts have been sent overseas. Letters of gratitude received by Dr. Graham are convincing evidence that the service to our overseas confreres is worth while.

In addition to the two committees above, there were eleven other Executive Council Committees to carry on special work of the Academy.

PROGRAM

A review of the program for the past year should be recorded here:

- (1) "The Clinical Use of Acrylic Resins in Dentistry"
Walter H. Wright, D.D.S., Pittsburgh, Pa.

FINE WHITE SHIRTS

for Professional Use

Expertly tailored from fine, lustrous broadcloth materials, fully tested for strength and shrinkage.

RETIRING EXECUTIVE MEMBERS

Five members of the 1941-42 Executive Council retired at the close of the year:

Edmund T. Guest, Past-President
Harold Swales, Treasurer
Fred H. Flora, Councillor
W. H. Walton-Ball, Councillor
Gordon W. Johnston, Councillor.

INNOVATIONS

Each Academy year there are new ideas or methods of conducting the affairs of the Academy. This past year, among other things, there were:

- (a) The collecting of old gold donated by patients to the War Service work of the Ladies' Auxiliary of the Canadian Dental Corps.
Nearly \$1,000 was realized by this means.
- (b) War Service Committee as previously mentioned.
- (c) A new Bulletin form of notification of meetings to the members.

CHARLES McLEAN,
Secretary.

PRE-EMINENT

The continued endorsement of Hutax products by members of the dental profession is a tribute to their unqualified pre-eminence.

Recent investigations indicate that Hutax dentifrices and brushes merit your enthusiastic recommendation.

Auditors' Certificate

We have prepared the attached balance sheet of the Academy of Dentistry as at 24th April, 1942, together with a Revenue and Expenditure Account. Subject to the following report, we hereby certify that in our opinion the attached balance sheet is properly drawn up so as to exhibit a true and correct view of the state of the Academy's affairs at that date, according to the explanations and information given us, and is as shown by the books.

Your Treasurer, Dr. H. A. Swales, has certified that all known liabilities to 30th April, 1942 have been paid, and that there were at that date no guarantees or contingent liabilities outstanding.

Recut Burs Are Really Good Burs

As the outlook for future supplies of burs is most uncertain it is in your interest to start and save your old burs now and at least assure yourself of a small supply. Burs sent to us are positively recut—not simply cleaned, according to numerous reports from satisfied customers. No sorting necessary on your part.

STUDY THIS DESIGN

....and see why this toothbrush is truly efficient

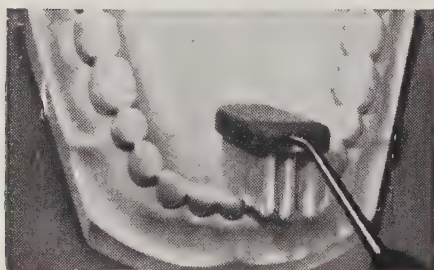

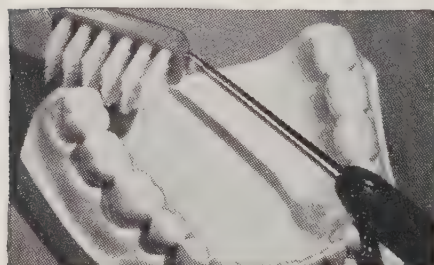

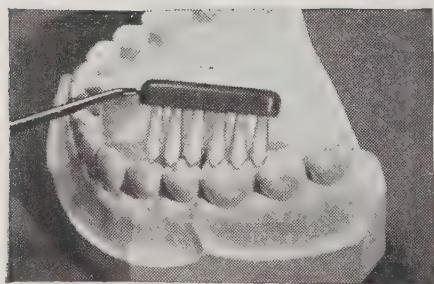

What do you look for in a toothbrush? Convenience? Efficiency? Whatever your requirements, we believe that once you've tried the Squibb Angle Toothbrush you'll be convinced that it will measure up to your standards.

The Squibb Angle Toothbrush is vastly different from the conventional style toothbrush. The easy-to-grasp (1) handle has a thin sturdy (2) metal shank which enables you to bring the brush head down to the gum line while keeping the handle in practically horizontal position. As you brush the lingual surfaces the bristles are brought in contact with interproximal spaces and a better cleaning job is made possible.

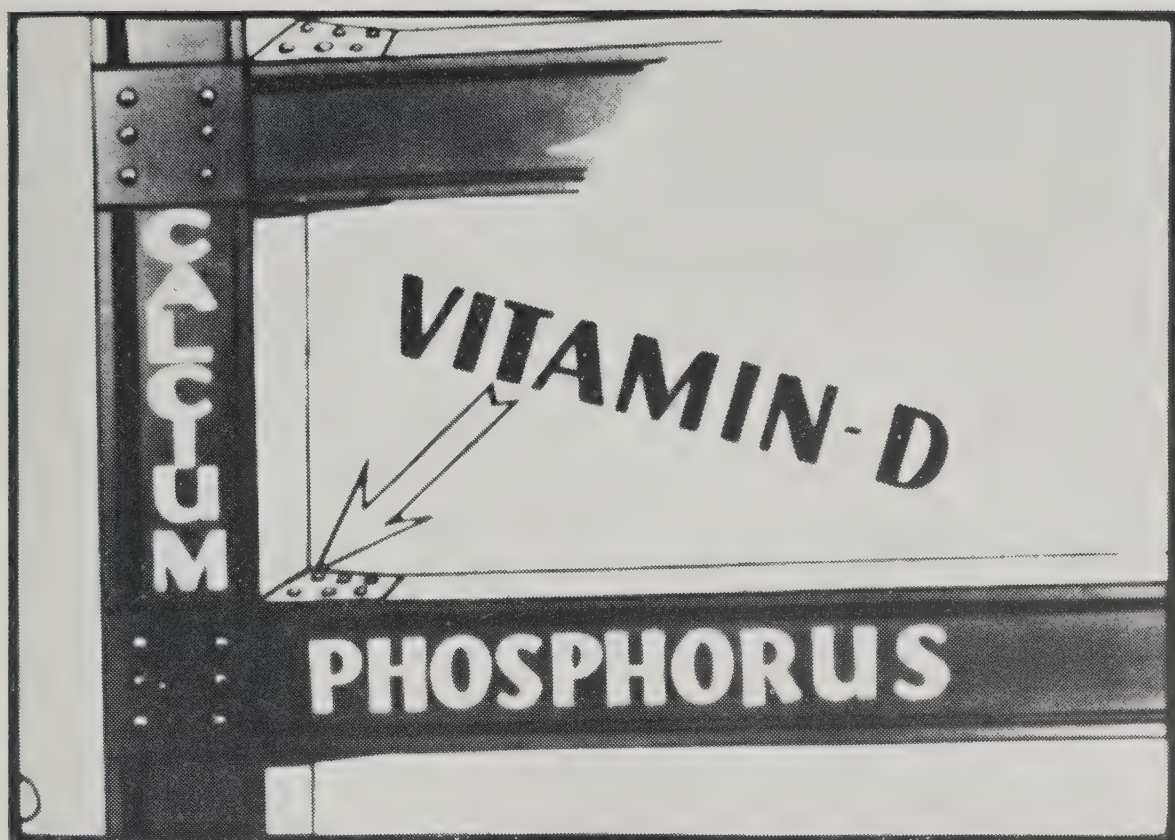

There's another difference. Notice that the (3) brush head is bent at an angle (4) just like your mouth mirror. This serves a definite purpose in that it facilitates brushing the difficult-to-reach back molars and the lingual surfaces of the incisors. In fact, you can reach exposed surfaces of all teeth, whether the dental arch is wide or narrow, and with any brushing technique.

(5) The Squibb Angle Toothbrush is a brush you will like to use yourself—one you will be pleased to recommend to your patients.

The Essential Vitamin in Bone Building

LIKE the rivets in a steel structure, Vitamin D is essential to sound bone structure for it enables the body to use calcium and phosphorus for bone and tooth protection.

Since milk is a good source of calcium and phosphorus, the Vitamin D enrichment of milk is a natural and desirable procedure.

Borden's *Golden Crest* is an Irradiated Vitamin D Milk sup-

plying a minimum of 320 International Units per quart. It is a blend of the finest milk produced by selected herds of Jerseys, Guernseys, Ayrshires, and Holsteins, and it is homogenized to give an even cream content throughout. The Vitamin D content of Borden's Golden Crest is determined by a responsible laboratory and controlled by the Wisconsin Alumni Research Foundation.

Protect your Handpieces!

Manufacturers say that regular and thorough cleaning of the handpiece is of just as great importance as oiling. Denco Handpiece Cleaner and Lubricant does both jobs thus assuring increased operating efficiency and longer life.

The Cleaner removes dirt, rust and gum from the interior of the handpiece. The Lubricant is refined specially for handpieces and will not gum.

Try these special preparations on a 20-day trial basis. If you are not entirely satisfied with the results, return the unused portions for *full credit*. Mail the coupon to-day to your nearest Denco house:

Toronto, Hamilton, Ottawa, Montreal, Quebec, Winnipeg, Saskatoon, Calgary

"RECLAIMED"

MOTOR OIL

*May Be All Right
but not for YOUR car*

Not being an automotive engineer, you might not be able to tell crankcase drains from fresh motor oil at first glance. But you'd rightly feel that such "second-hand" oil may be so contaminated that it's dangerous to use.

Reclaimed "acrylic" may also resemble the genuine at first glance. But certain ingredients, perhaps harmful to mouth tissues, must often be added to commercial molding powders to solve some difficult molding problem. The possible presence of these ingredients in reclaimed "acrylic" powder makes it unfit for dentistry.

Don't gamble with purity to save pennies.

Specify *Lucitone*! It's made by DuPont specifically for dentistry . . . and is guaranteed to possess every quality that makes for utmost confidence with dentist and patient.
